CRAFTING DREAMS

MEET THE CREATOR

From a young age, I have been fascinated by the creative process: the creation of objects that are both functional and aesthetic. Lighting, in particular, caught my attention, with its ability to transform spaces and create ambiance.

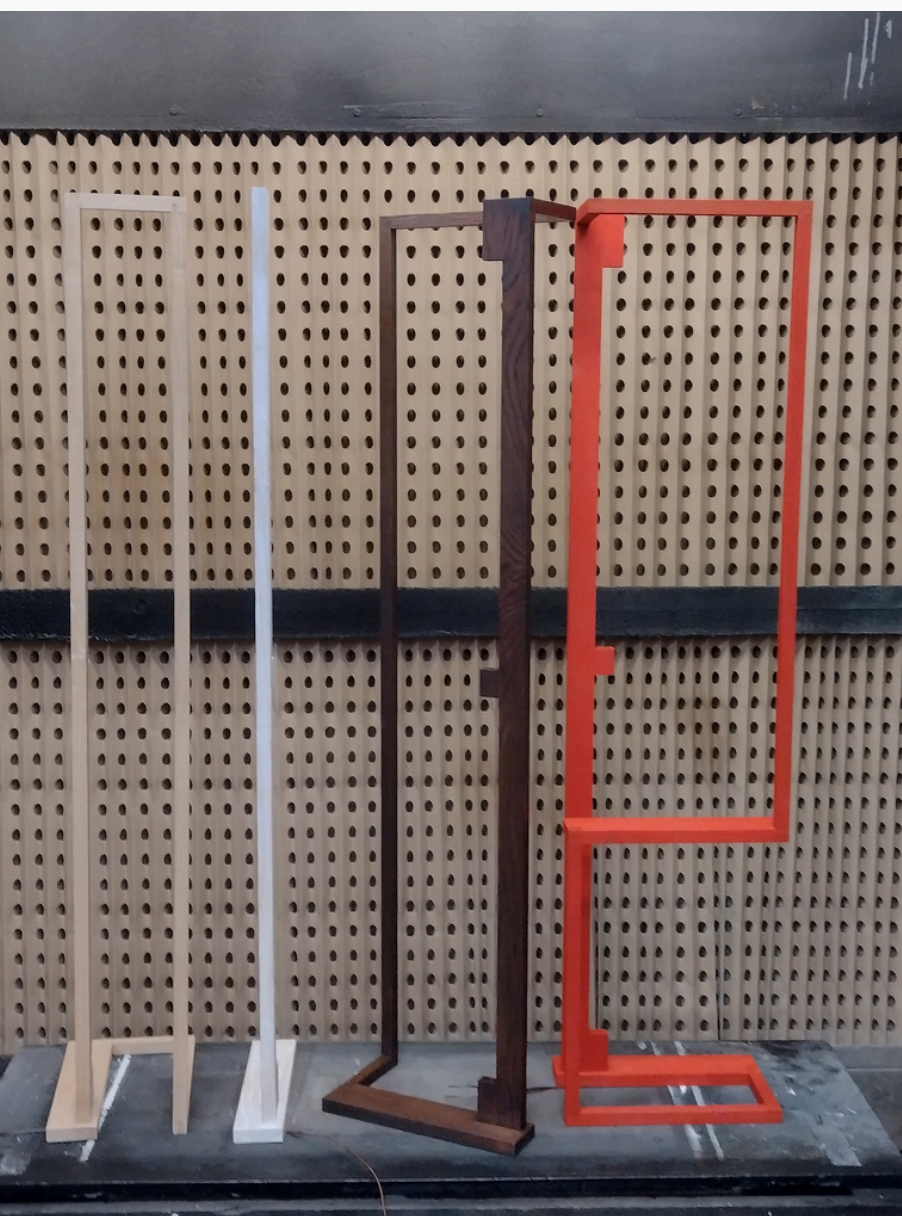

My favorite material is wood, easy to work with, warm, beautiful, and strong, but I noticed that my early designs sometimes became too large and pronounced. This challenged me to refine the design process and explore new, minimalist directions.

This led to the creation of my first floor lamp – a closed loop with integrated LED strips. Although the design was not initially rotatable, it marked an important step in my development as a designer.

With the experience I had gained, I started working on a second lamp, this time with rotatable LED strips and an even slimmer design.

While studying the lamp, I suddenly saw a zero. And in fact, I didn't just see a zero, but also the possibilities to create the shapes of numbers 1, 2, and more.

And if you can form numbers, why not letters? Letters, in turn, form words. Suddenly, I saw the opportunity to create an entire series of collections within one style.

What began as a passion grew into a dream: my own lighting company.

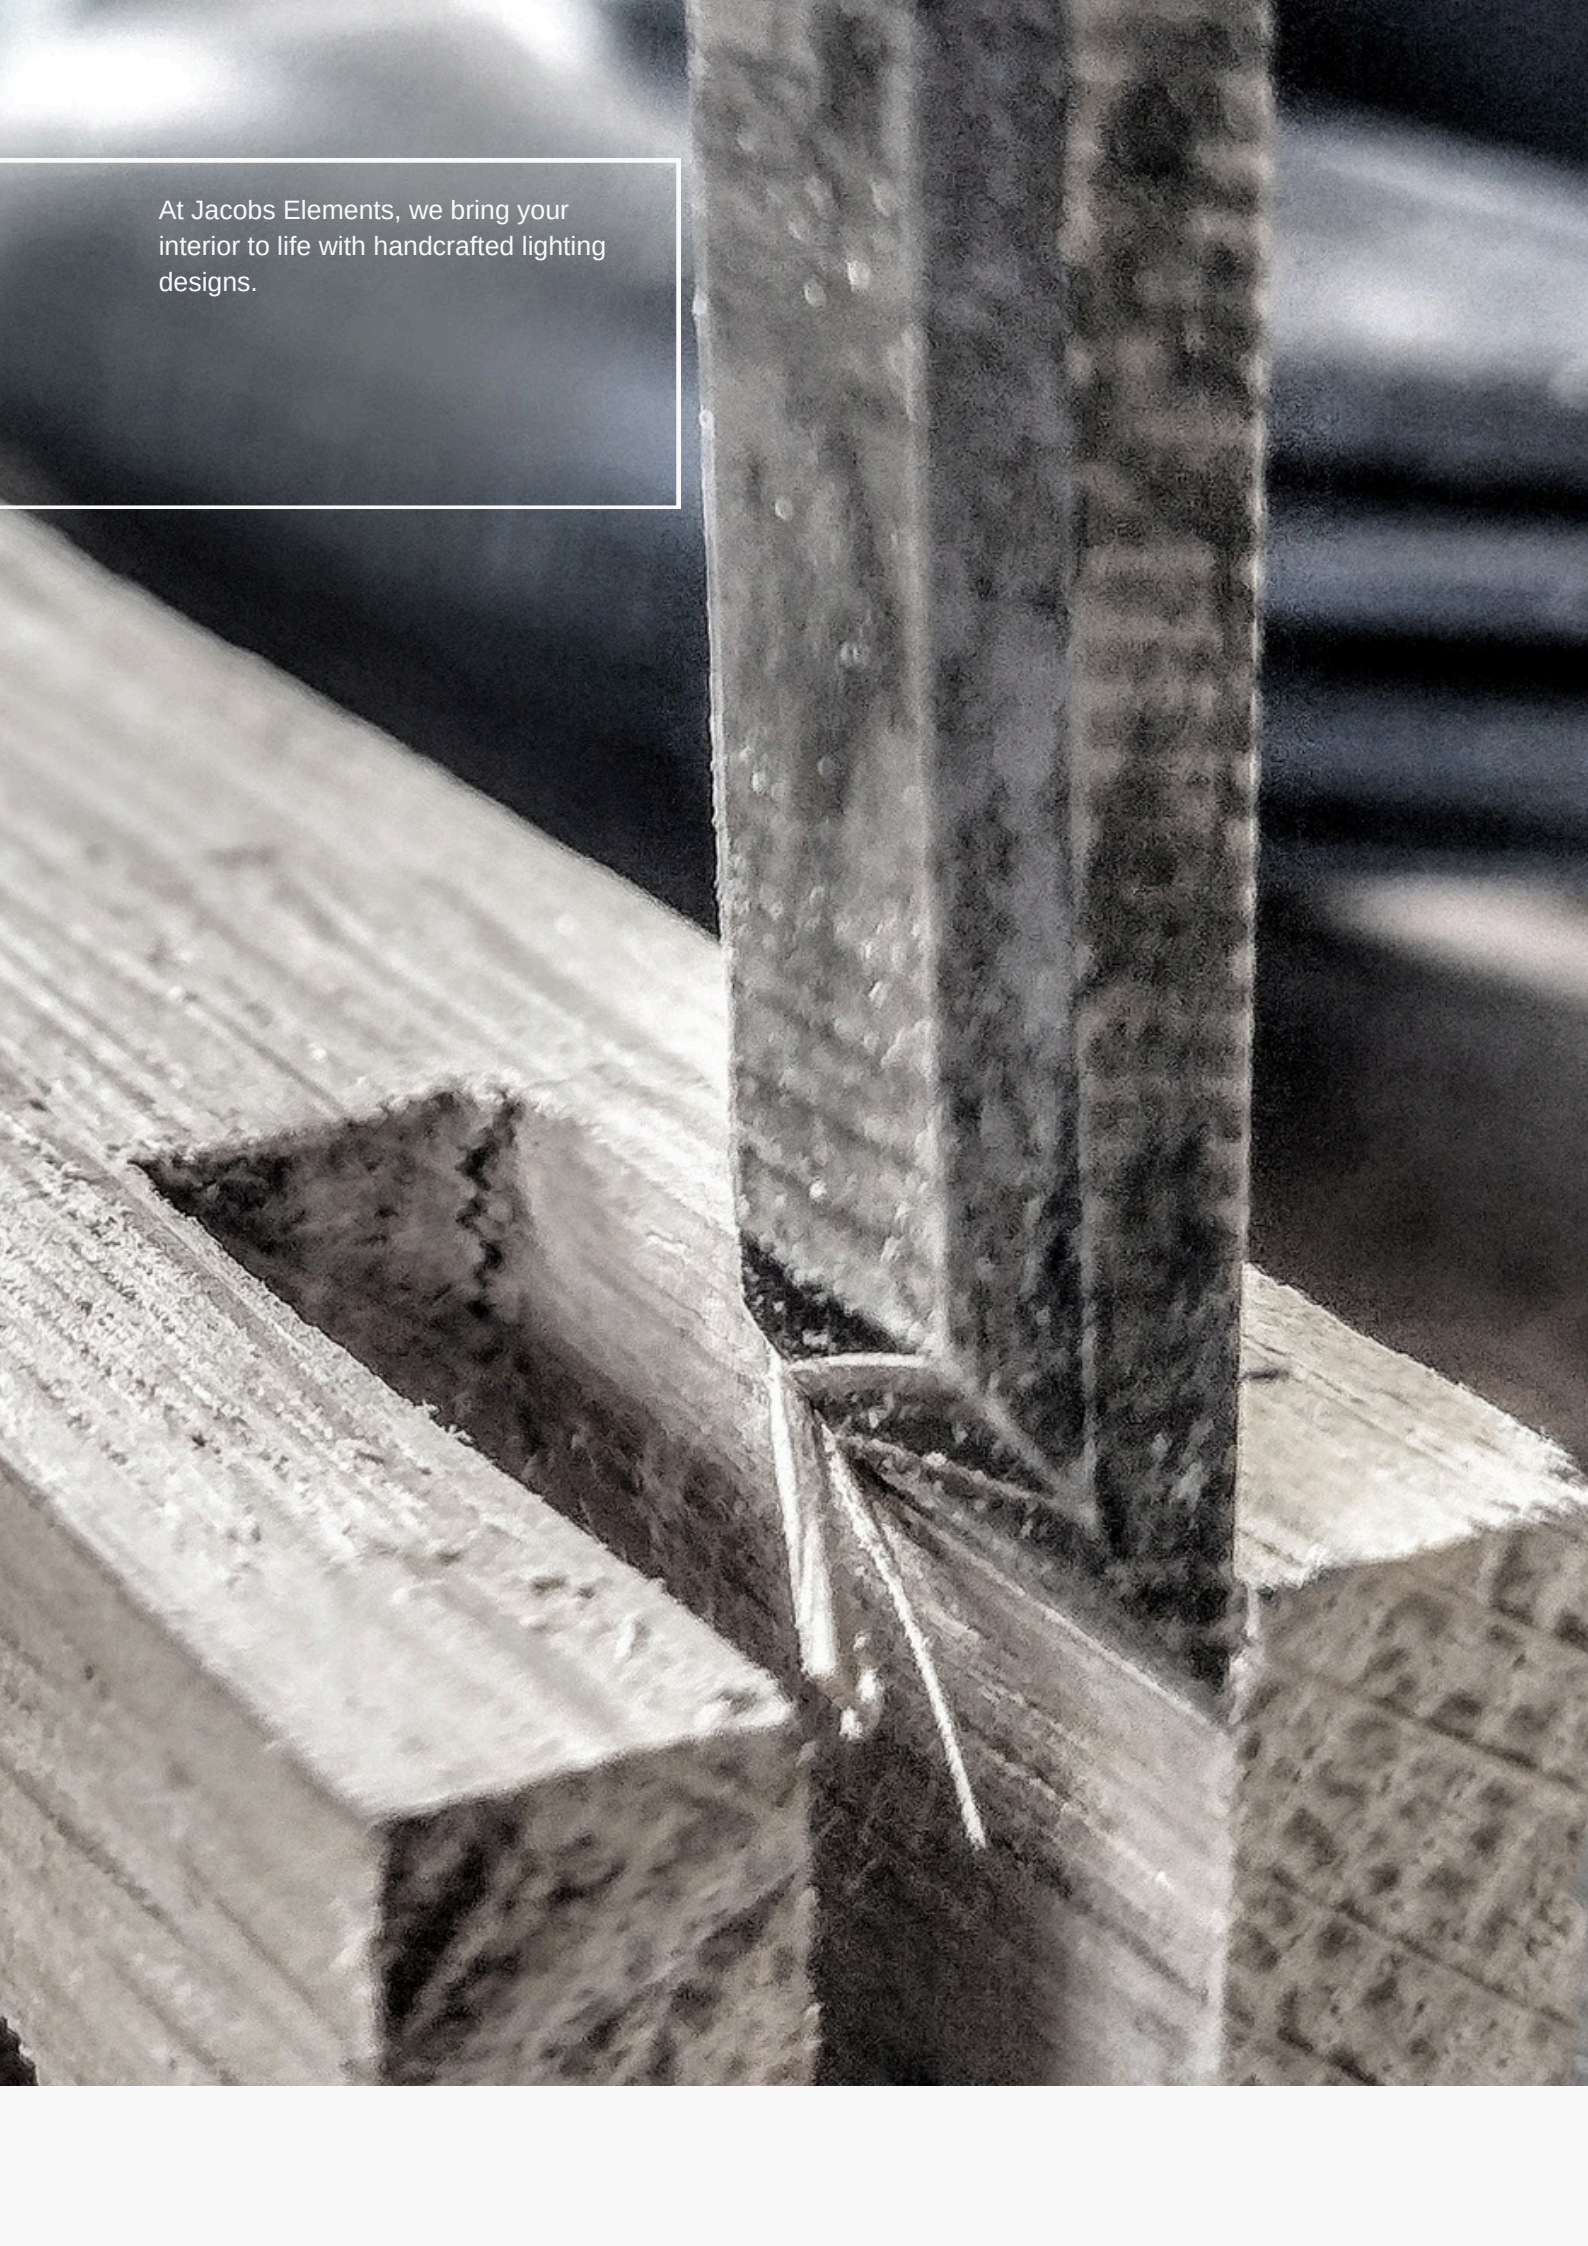

With great pleasure and pride, I present to you the first collections of Jacobs Elements: Based on a personal vision where forms are created in a very natural way.

Digits, Signature, and Hyphen.

Enjoy exploring and reading,

Jacobs Sven

At Jacobs Elements, we bring your interior to life with handcrafted lighting designs.

WARM MINIMALISM

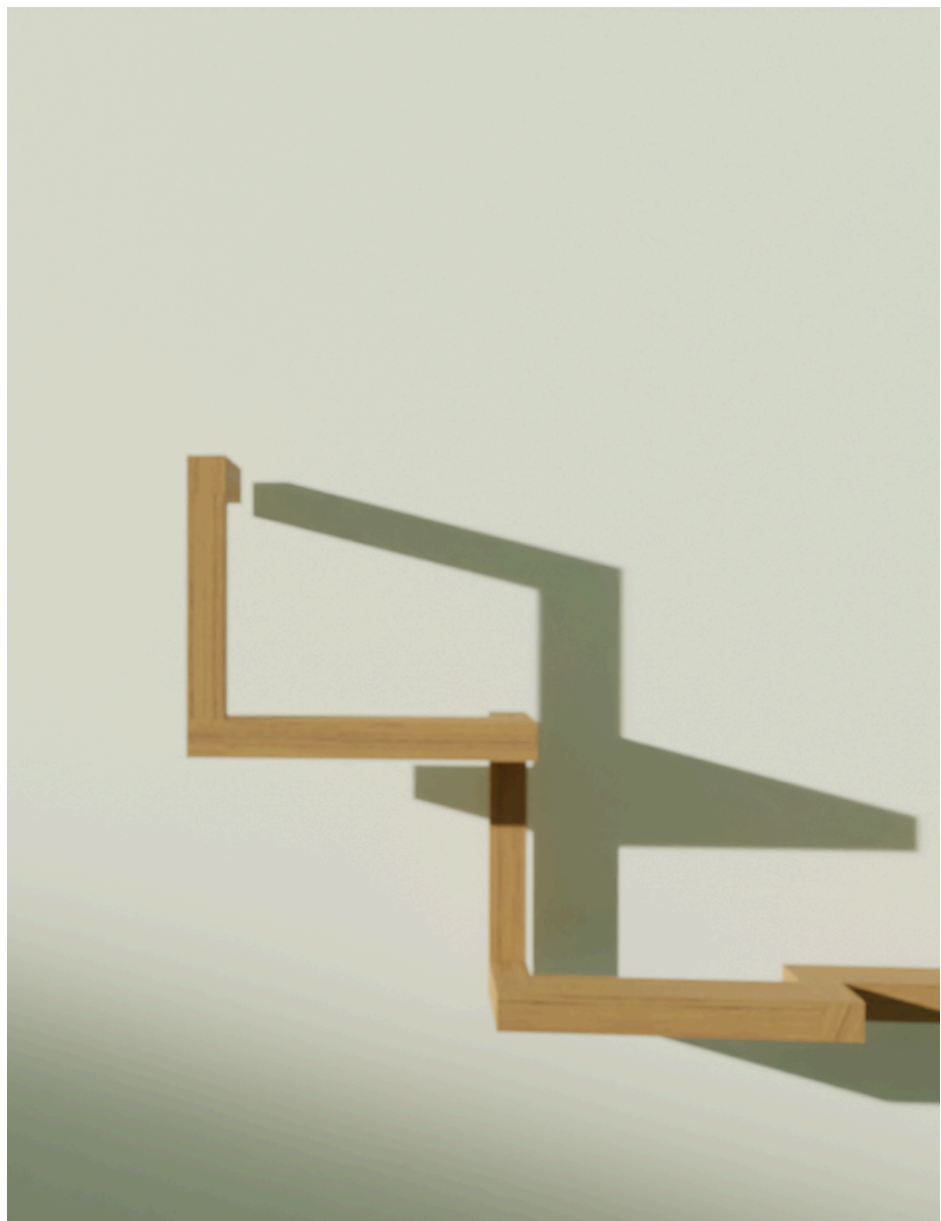

OUR DESIGN PHILOSOPHY

As a Belgian designer of wooden light constructions, we distinguish ourselves in the lighting design world in a unique and unconventional way.

Our unique style is sleek and minimalist, yet always warm and authentic.

Letters, words, and names inspire us to create new, unique forms where your story defines the final result.

Every home, space, and person is unique, which is why we create custom lighting designs in addition to our standard collections.

DIGITS

ILLUMINATED

Discover the Elegance of Digits, a collection of floor lamps where sleek design meets natural charm. Crafted from high-quality wood, these lamps blend minimalist aesthetics with a refined finish.

Each design is inspired by the simplicity of numbers, offering timeless elegance. The LED elements can rotate 360°, allowing you to direct the light exactly as you wish.

A subtle detail reveals our Belgian roots: the combination of the base plate, wood, and felt forms the Belgian tricolor.

Turning the light on and off is effortless with a subtle touch of the wooden surface, adding a refined and elegant touch to your interior.

Digits are not just floor lamps, but functional, stylish works of art that perfectly combine minimalist charm with artisanal craftsmanship.

This stylish floor lamp blends modern minimalism with warm wooden accents, perfectly fitting into a sleek interior. The soft, indirect light creates a pleasant atmosphere, ideal for relaxing in a contemporary living space.

The scraper, a thin and sharp piece of steel, is carefully drawn across the wood surface. This tool removes thin layers of wood fibers, resulting in a very smooth finish.

This technique is particularly effective for smoothing out fine irregularities, ensuring that the wood surface is beautifully smooth.

SIGNATURE

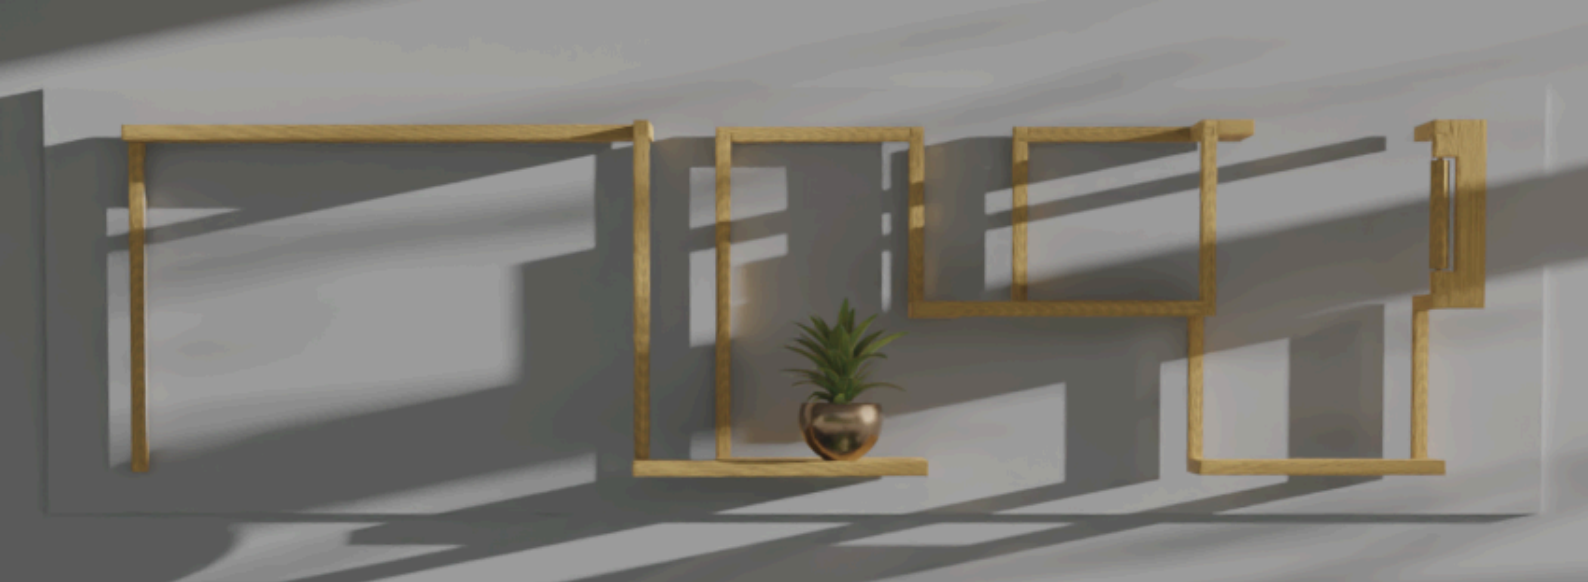

WHAT'S YOURS

Signature, the exclusive segment of Jacobs Elements, where lighting is crafted artistically and tailored to perfection.

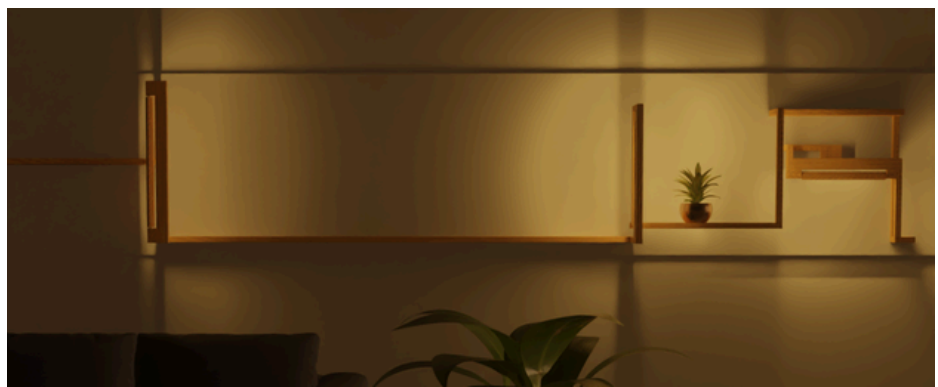

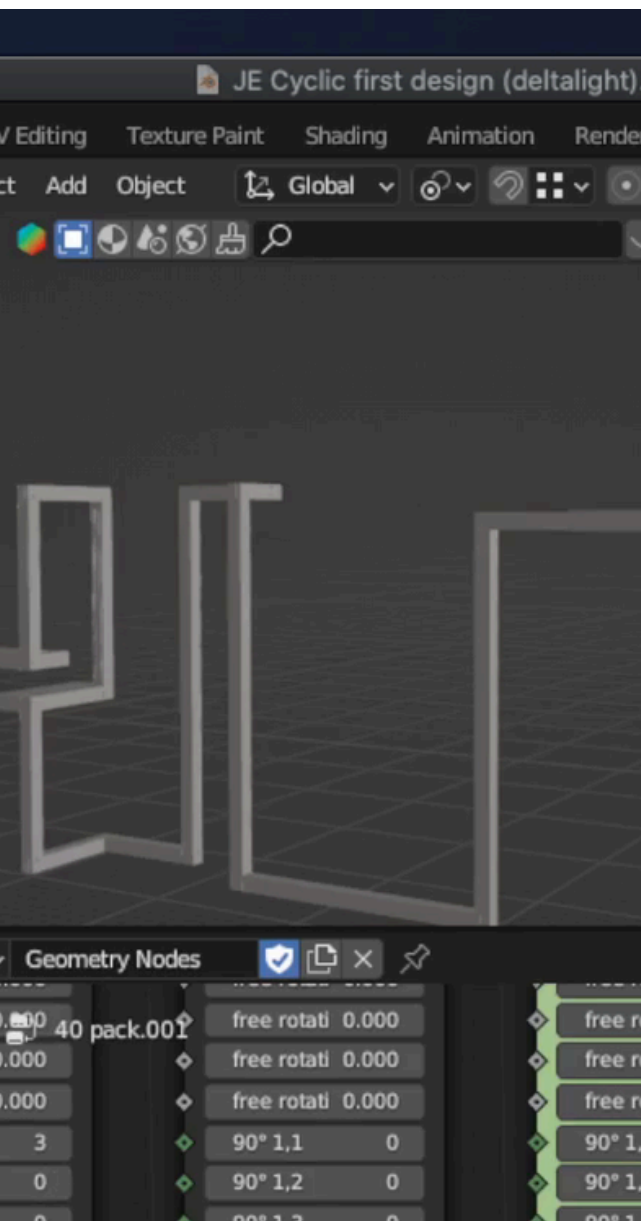

Signature offers you the opportunity to have a fixture designed based on your personal name, a special word, the name of your restaurant, B&B, or any other unique concept.

Each Signature design is based on a word that can only be viewed from one specific chosen angle.

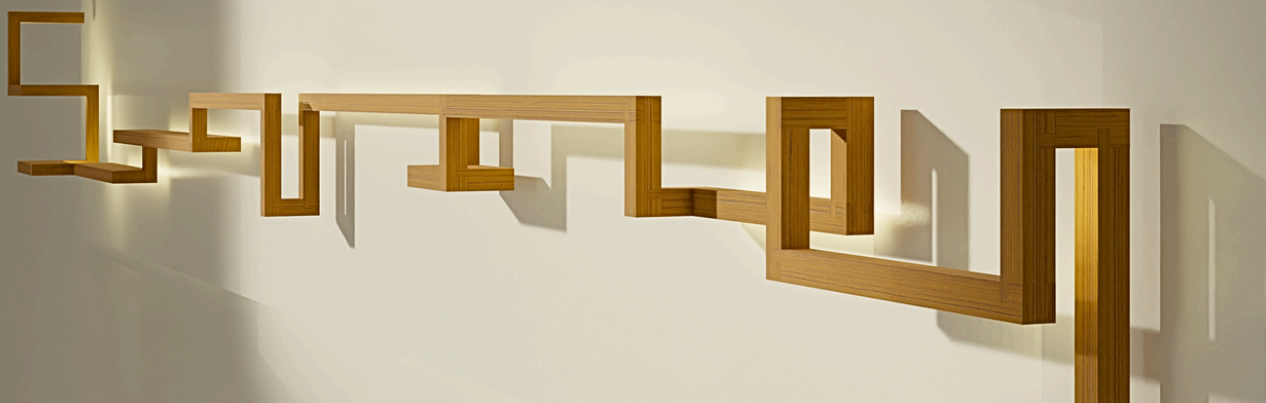

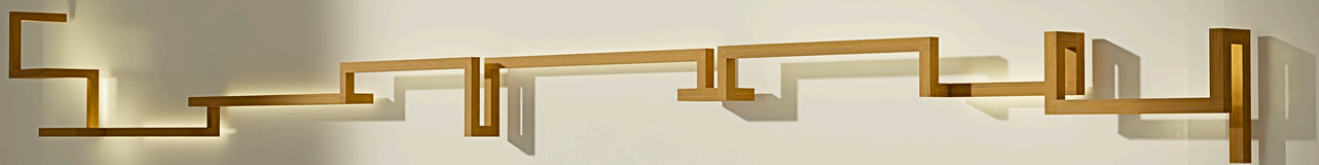

From other perspectives, the fixture reveals an abstract line, creating an elegant and surprising effect.

After your request, you'll receive a photorealistic preview of the design. Your feedback and preferences will be incorporated before the fixture is finalized and produced.

Each piece is unique and special—a one-of-a-kind artistic statement crafted just once.

Get inspired by Signature and add a personal touch to your interior or business with wall lighting that perfectly reflects our unique style and your identity.

Together(Samen in dutch), we'll work towards a lighting solution that exceeds both your functional and aesthetic expectations.

HYPHEN

YOUR SPACE

Take a look at the versatility of Hyphen, a modern lighting design that harmoniously blends style and flexibility.

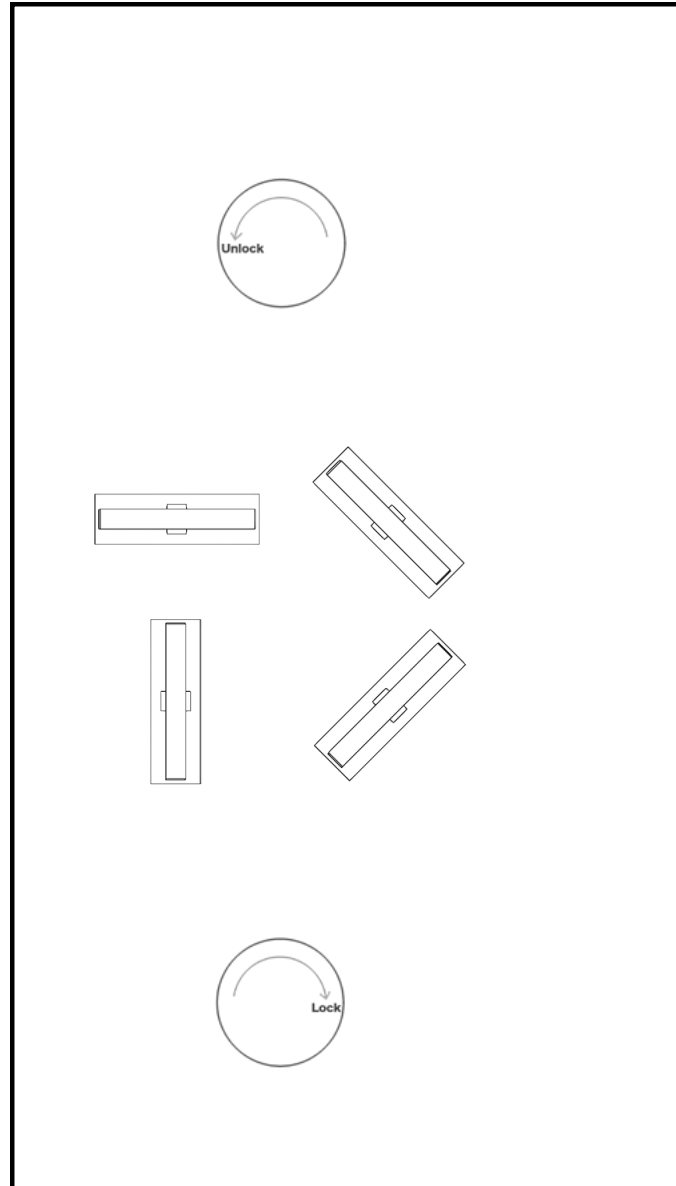

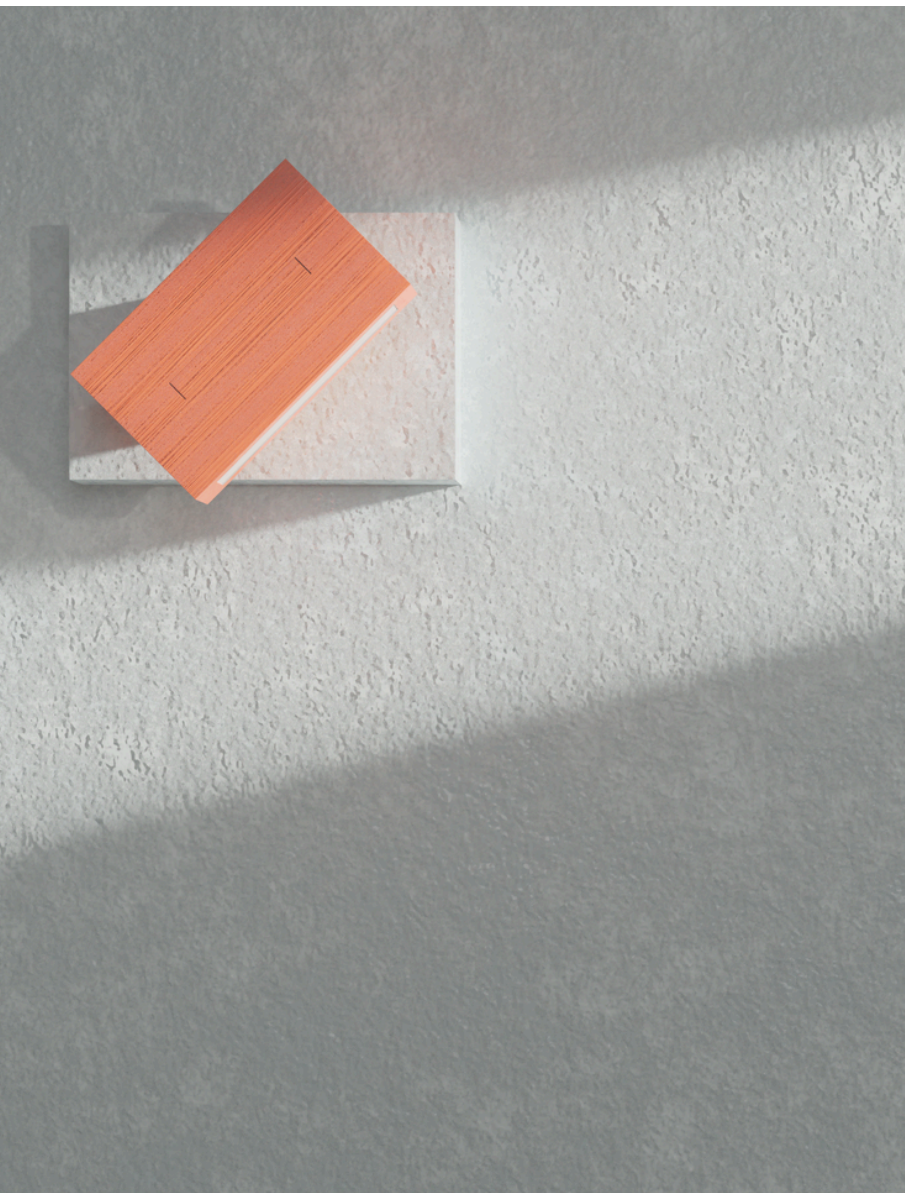

With an integrated LED strip and rotatable elements, Hyphen offers a unique way to illuminate your space.

Hyphen gaat verder dan traditionele lichtarmaturen. De in twee richtingen roteerbare LED's geven jou de vrijheid om precies te bepalen welk deel van je interieur in de schijnwerpers staat.

Rotate the light upwards for a subtle, indirect glow, or downwards for more intense, direct illumination.

Direct Hyphen to the left, right, or any other angle to accentuate specific elements in your room.

The distinctive LED element not only provides bright and energy-efficient light but also gives Hyphen a contemporary look.

The adapter is the heart of Hyphen. This low-voltage component is rotatable 360°.

Thanks to the simple click system, Hyphen can be swapped or reversed, allowing you to choose from various models and finishes.

SHELF

AN ADDITION

Shelf, a refined addition that seamlessly combines design and functionality.

A delightful extra featuring an adjustable shelf, giving you the freedom to place it at various heights and on different sides.

Slide the shelf along the slot over any vertical section of 22 x 22 mm, and secure it with the wheel. Installation couldn't be simpler.

By gluing two pieces of wood with the grain perpendicular to each other, we not only enhance the beauty of the Shelf but also its strength.

This allows you to fully customize your fixture to match your personal taste and the dynamics of your space.

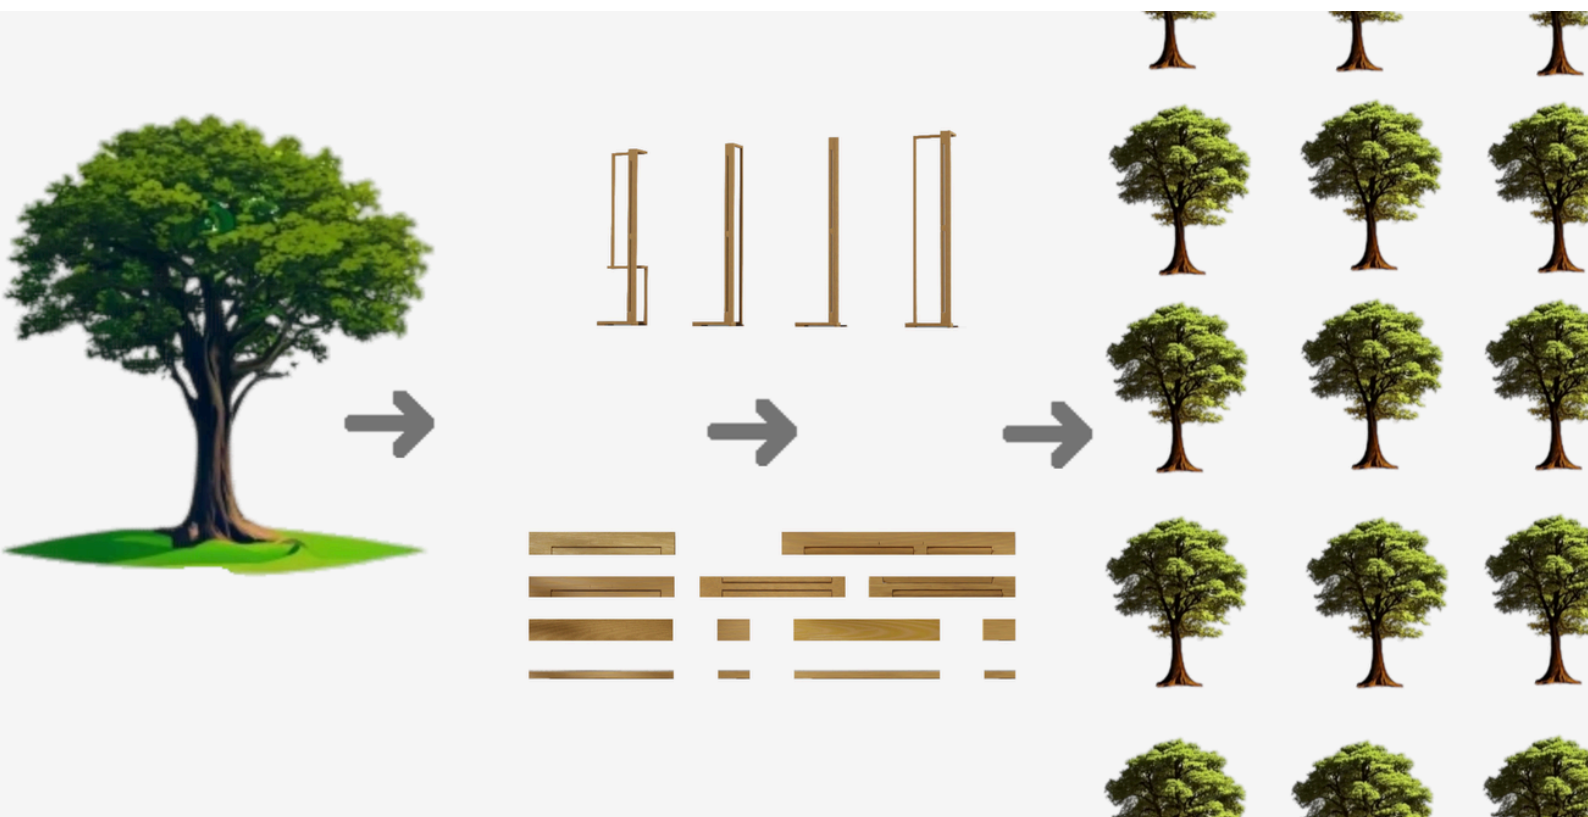

Adjusting the height is done by clicking the shelf up to move it and then laying it flat again. The weight of the object on the shelf ensures that it becomes even more securely fixed.

SUSTAINABILITY

OUR NATURE

Our unique lighting designs not only represent high-quality craftsmanship and aesthetic elegance but also a deep commitment to sustainability. What we take from nature, we give back with care.

That's why we've introduced a simple yet powerful initiative: for every lamp we sell, we plant a new tree. If one tree produces 20 fixtures, we plant 20 new trees. By choosing a lighting design from Jacobs Elements, you contribute to a more sustainable world. Together, we help nature thrive for current and future generations.

Our designs are also crafted from carefully selected, high-quality materials and components. Every detail, from the wood to the electronic elements like LED strips and drivers, is chosen with great care.

Our thoughtful choices ensure a long lifespan for your lighting, allowing you to enjoy it for years with minimal ecological impact and peace of mind.

MODELS

DIGITS

Standard Specifications

Product Information

Collection: DIGITS

Application: Indoor

Dimensions (L x W x H): 350 x 220 x 1500 mm

Technical Specifications

Input Voltage: 100 - 240 V~

Dimmable: Yes

Dimming Method: Touch control

Light Source: 2 x COB LED strips (2 x 580 mm)

Light source replaceable: Yes

Color Temperature: 2700 K, 3000 K

CRI: 95.4

Lumen Output: 1181 lumens (2 x 590.5 lumens)

Beam Angle: 120°

Adjustability: 2 x 360° rotatable LED elements

Cable Length: 2 meters

Energy Class: A

Material and Finish

Diffuser: Black

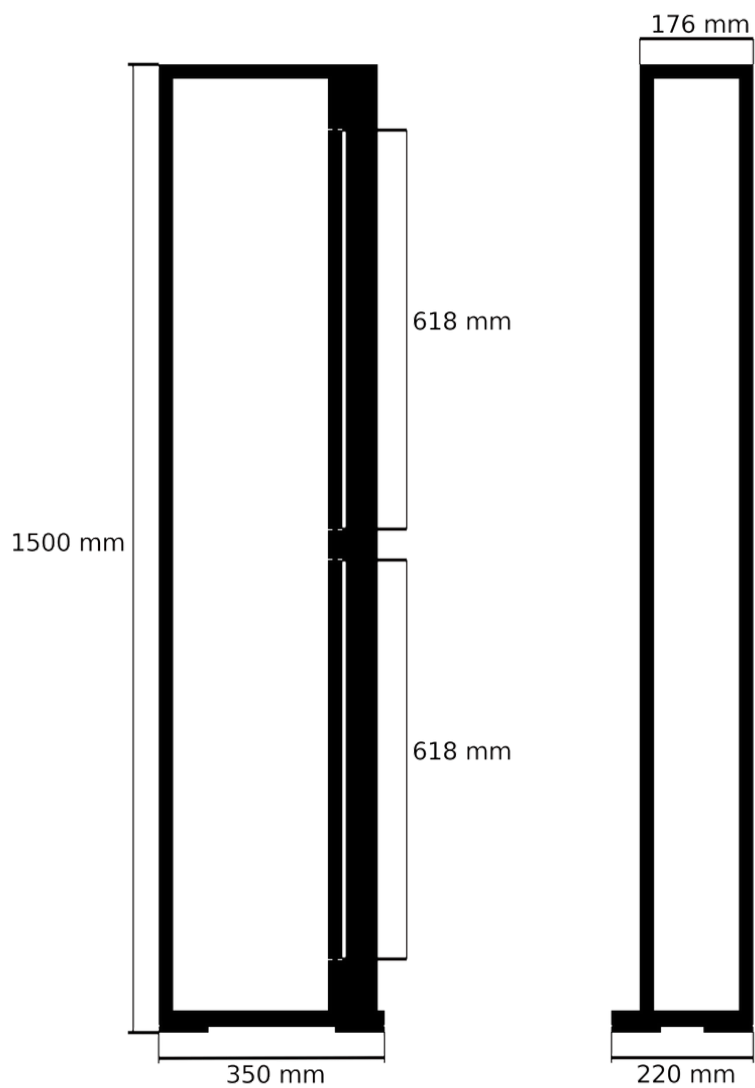

Frame Material: Wood

Wood Finish: (Natural), matte varnish

Base Color: Black

Base Finish: Powder-coated steel

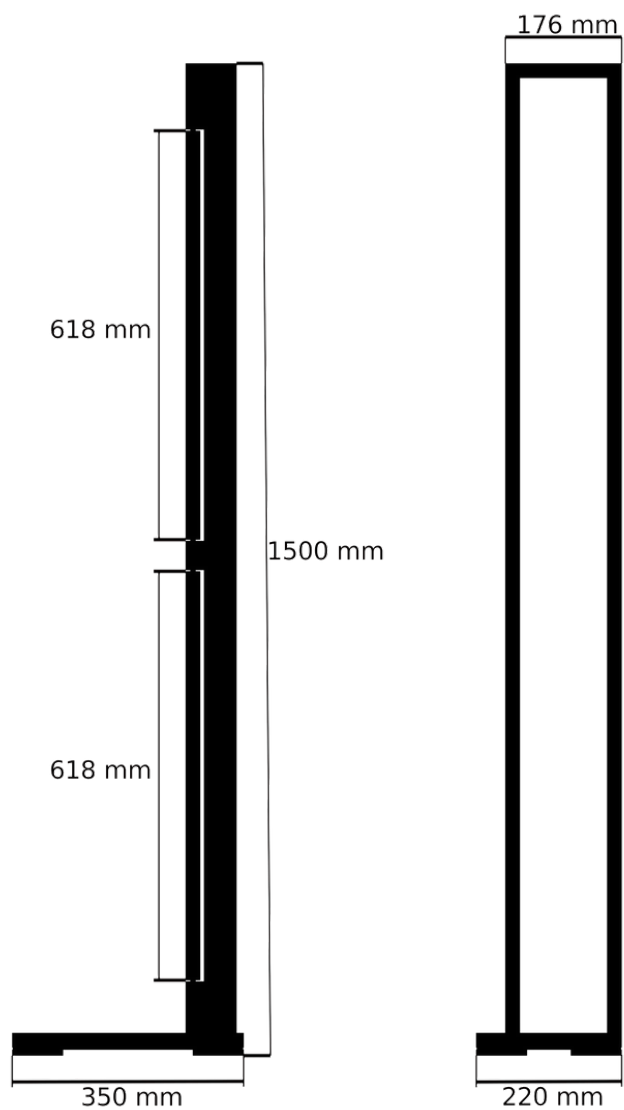

ZERO D000

Weight : +/- 5,5 kg
Compatible with Shelf : Yes
Max load capacity : Load capacity Shelf

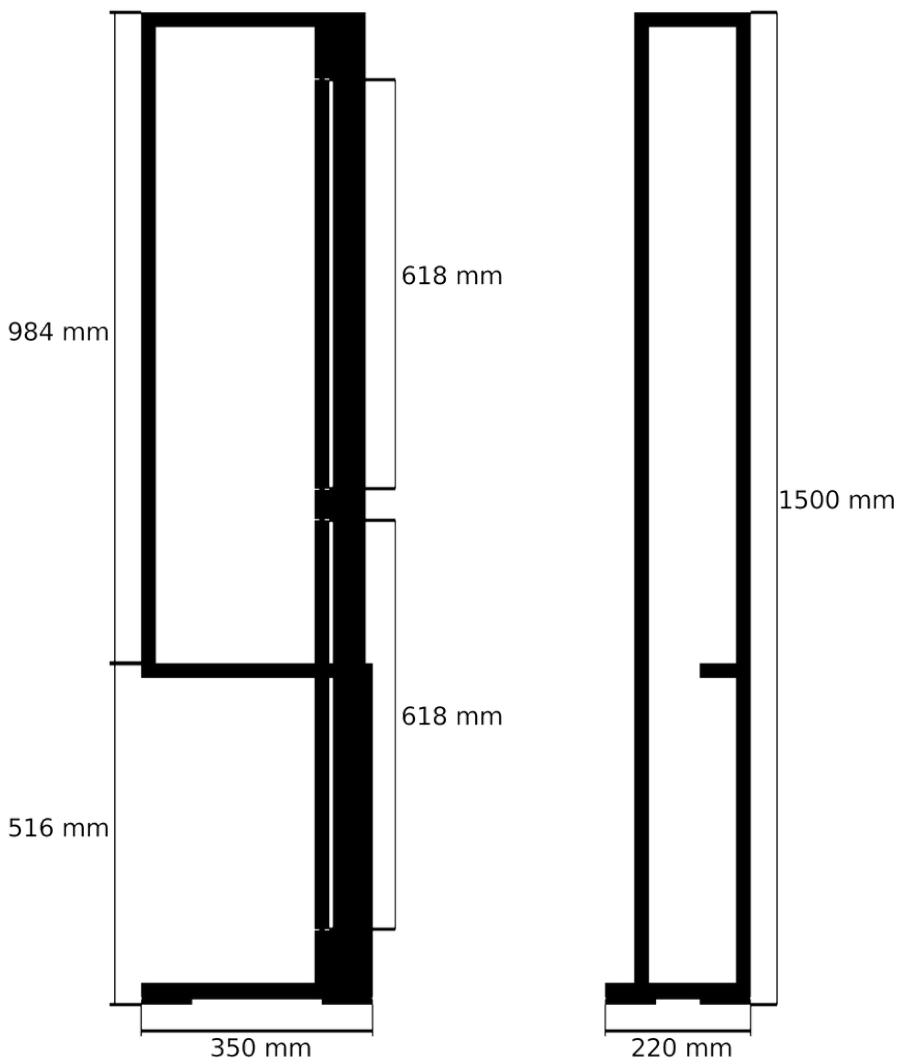

ONE
D001

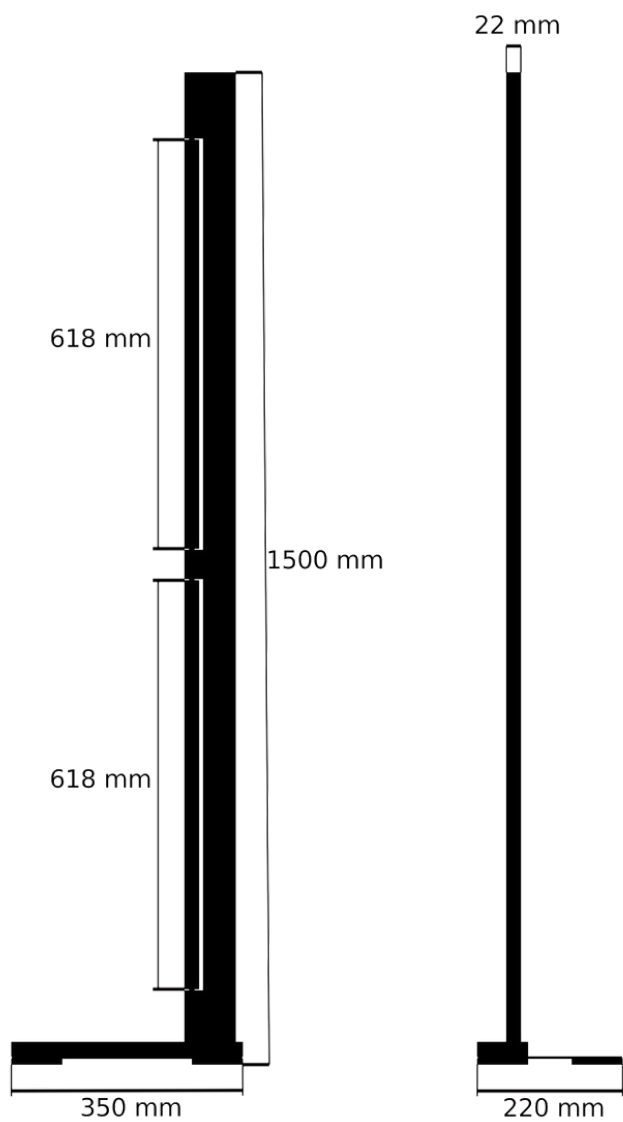

Weight : +/- 5,5 kg
Compatible with Shelf : Yes
Max load capacity : Load capacity Shelf

FIFTY-ONE D002

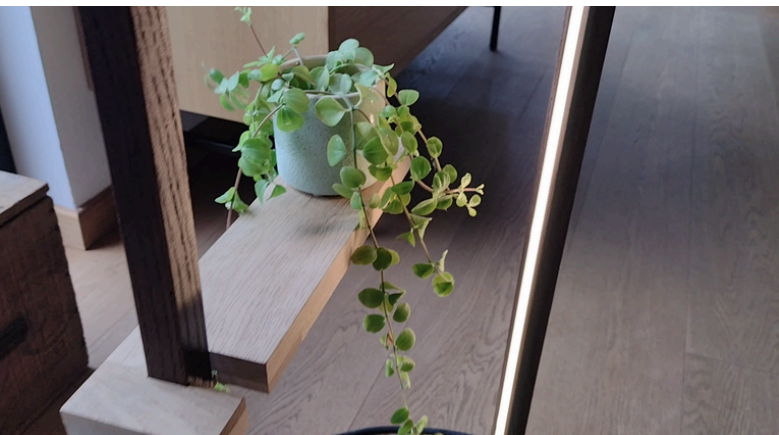

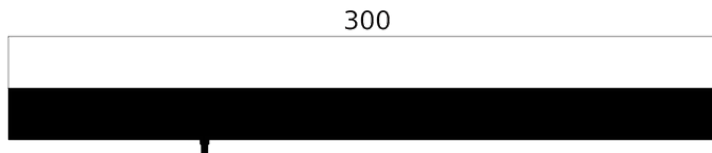

Weight : +/- 5,8 kg
Compatible with Shelf : Yes
Max load capacity : 1,5 kg

FRACTION D003

Weight : +/- 5 kg
Compatible with Shelf : Yes
Max load capacity : 0 kg

SHELF S001

Dimensions (L x B x H): 300 x 77 x 22 mm
adjustability: On each vertical element of 22 x 22 mm
Load capacity: 1,5 kg
